

Your green living one-stop-shop
Serving both residential and commercial customers

What Green Pathways will do after conducting an Energy Use Evaluation

Energy Conservation

- Outline next steps - Green Pathways will prepare a conservation program for you: improving the sealing and thermal conductivity of your premises, replacing your light bulbs, reducing the temperature on your water heater, and more.*
- Green Pathways will identify the conservation tools and devices that will help you achieve your conservation goals, together with their procurement.*

Energy Efficiency

- Identify items, appliances, and systems that could be replaced by more energy efficient items*
- Prepare a plan – a pathway – to fit your particular situation and circumstances allowing you to become more energy efficient*
- Assist in the acquisition of energy efficient devices, appliances and systems, and provide post installation support*

Your first step begins with a Green Pathways Energy Use Evaluation
